General Information

Paper copies of cited U.S. patents and U.S. patent application publications will cease to be mailed to applicants with Office actions as of June 2004. Paper copies of foreign patents and non-patent literature will continue to be included with office actions. These cited U.S. patents and patent application publications are available for download via the Office's PAIR. As an alternate source, all U.S. patents and patent application publications are available on the USPTO web site (www.uspto.gov), from the Office of Public Records and from commercial sources. Applicants are referred to the Electronic Business Center (EBC) at <http://www.uspto.gov/ebc/index.html> or 1-866-217-9197 for information on this policy. Requests to restart a period for response due to a missing U.S. patent or patent application publications will not be granted.

Election/Restrictions

1. Applicant's election without traverse of claims 24-27 in the reply filed on 07/07/04 is acknowledged.

Drawings

1. Figures 6A-6B, 7A-7B, and 8A-8B should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 24 is rejected under 35 U.S.C. 103(a) as being unpatentable over the applicant's admitted prior art (AAPA) of this application in combination with Haller (US 4,888,632).

With respect to claim 24, AAPA (figures 5A-5G, 6A-6B, 7A-7B, and 8A-8B and the Background of the Invention of this application) teaches a semiconductor device serving as an intermediate product in which at least a first interlayer film 103, an etching stopper film 104, a second interlayer layer 105, a first hard mask 106, and a second hard mask 107 are built up on a substrate in the order mentioned, said second hard mask having a trench pattern that exposes said first hard mask, comprising:
a anti-reflective film 113 that is formed so as to be embedded in the trench pattern in such a manner that the overall surface of said film will be flat (fig. 8A-8B of this application); and
a photoresist 111 is formed on said anti-reflective film and having an aperture pattern, which is disposed over the area of the trench pattern, having an opening width less than that of said trench pattern.
However, AAPA fails to teach that the anti-reflective film is a light absorbing layer.

Haller teaches that light absorbing material is used to provide anti-reflective function. See the abstract.

It would have been obvious to one of ordinary skill in the art of making semiconductor devices to use light absorbing material in place of anti-reflective material in the device of AAPA to obtain the above benefit.

Allowable Subject Matter

3. Claims 26-27 are allowed.
